Chamber president says:

## Offshore oil rig servicing companies leary of Hancock

By WAYNE DUCOMB JR.  
Industries serving expected offshore oil and gas drilling operations in the Mississippi Sound near Hancock County will probably not locate in this area unless efforts to entice these businesses begin soon, says Breaux, Hancock County Chamber of Commerce president and owner of an oil field service business in Kiln, Friday said.

Charles Blaylock, director of the State Department of Natural Resources in Jackson, Friday confirmed the Mississippi Commission of Natural Resources Wednesday leased two mineral rights tracts located just west and northwest of Cat Island to Chevron, U.S.A.

The leased underwater lands are south of Pass Christian. Drilling rigs in these areas will be visible from Hancock and West Harrison shorelines. State geologists report the Tuscaloosa Trend, an oil and gas rich limestone formation which runs through Texas and Louisiana, may extend into that area of the sound.

The department director said the \$3,241,000 in lease sales are for 5,760 offshore mineral acres.

He explained the leases are for a five-year period beginning Wednesday and subject to renewal if production or drilling is underway.

The state offered eight tracts for lease, but only received bids on six parcels from Chevron and Conoco, Inc. and the commission rejected four of those proposals as insufficient bids.

Blaylock expected drilling operations at the earliest would begin in about one year because drilling companies must obtain an environmental permit from the U.S. Army Corps of Engineers Mobile District Office, a drilling permit from the State Oil and Gas Board in Jackson and a drilling plan outlining geological affects must be approved by the State Bureau of Marine Resources office in Long Beach.

State officials had hoped to generate \$50-\$120 million in the initial offshore oil lease sale, but Breaux predicts if Chevron is successful in its drilling efforts that other drilling companies will begin offering premium prices for leases in the sound.

Regarding Hancock County's role in providing locations for oil service businesses, Breaux stated, "A thing we all are going to have to think about now is if we're satisfied with our county as it is now or if we want to see this area grow."

"But the word is out in the oil industry, don't fool with Hancock County," he reported.

Breaux reports the oil industries' ill will toward Hancock result from the fact that the county is not a member of the Mississippi Pumping Service, Inc. in developing drilling mud waste holding ponds here.

The chamber president described Curtis Johnson, Mississippi Pumping Service president, as a forerunner of the oil service industries.

"Everybody was on to him (Johnson) and concerned about pollution. No one would sell him land," Breaux stated.

He said Johnson had to establish his business by investing some \$500,000 and recoup that money by importing wastes from Louisiana drilling operations through Port Bienville.

Breaux noted Hancock County Port and Harbor Commission Executive Director W. Wilson Webre's objections to Johnson's enterprise.

"They're (the commission) so used to dealing with these formal necktie people representing big industries. These companies come with they're engineers and present big plans for multi-million-

LIEU LAND DESCRIPTIONS—Exhibiting a stack of documents providing descriptions, appraisals and photographs of some 3,480 acres of lieu lands in Hancock County is Billy Sills, Hancock County School District superintendent of education. Sills recently explained the state is requiring that all the land be sold to the highest bidder. The deadline for bids is 5 p.m. Friday at the Secretary of State's office in Jackson. (Staff photo by Wayne Ducomb Jr.)

### Superintendent notes:

## Hancock lieu land bid deadline Friday

By WAYNE DUCOMB JR.  
The deadline for Hancock County lieu land bids is 5 p.m. Friday at the Secretary of State's office in Jackson.

Billy Sills, County School District superintendent of education, recently reported some 3,480 acres of lieu land in Hancock is scheduled to be sold to the highest bidder in the land offer.

He said most of the parcels are located in the northern portion of the county near the Pearl River County border.

"I would like to see the people of Hancock County get first priority in purchasing this land," Sills stated.

The superintendent noted that many of these parcels are inhabited or fenced for farming, but he did not know if those living or utilizing the property were paying taxes or leasing the land for its use.

He said persons now utilizing or living on lieu lands may submit a bid for that land and if their bid is exceeded the state will provide an opportunity for them to meet the high bid and retain ownership.

"Hancock County doesn't get anything for the sale of this land," he stated.

Sills explained the lieu lands are owned by other Mississippi counties, but legislation recently required these counties to sell any lands owned outside of their boundaries.

He further explained lieu lands developed from a 1802 United States law which declared every 16th Section

in a geographic township be reserved and utilized to help support public schools.

But prior to the law, many state governors had issued land patents to early settlers which included some 16th Sections, Sills said.

Because of those patents, the state—to provide a fair distribution of school land to each county—designated parcels in other counties "in lieu" of the 16th Section property, he noted.

The superintendent revealed eight central and northern Mississippi counties own 3,320 lieu land acres in Hancock, 12 counties each own less than 12 acres, and eight of the counties own less than one acre each.

He cited Washington County owns the most acreage in Hancock (664 acres) and Lawrence County has the smallest parcel which is about the size of two parking spaces (.012 acres).

Sills urges Hancock residents interested in purchasing this property to contact him immediately to obtain information to properly submit bids.

Sills also has legal land descriptions of the property which also provides the minimum amount of money which will be accepted for a given parcel and photographs of the land.

The superintendent's office is in the Dan M. Russell Sr. Memorial Youth Court Center on Court Street in Bay St. Louis behind the County Courthouse.

The bids will be opened at 10 a.m. July 21 in Room 201 of the Heber Ladner Building at 401 Mississippi St. in Jackson.

## Sewer main break suspect in bay, bayou pollution

By BRENT MACEY  
A sewer main break in Bay St. Louis is the suspected cause of an annoying stench and numerous complaints from residents in the Cedar Point area of the city.

Raw sewage was spotted flowing from a natural bayou which drains a swamp area behind Hancock General Hospital.

The bayou flows under North Beach Boulevard into the Bay of St. Louis directly above the Bay-Wayland Yacht Club.

Bill Johnson, utility department head, Friday stated he only recently received a call from Louis Fernandez, county health inspector concerning the

"We don't know first hand yet that there is a break. We're investigating it now," he said.

Since the break is believed to have occurred in the swamp, efforts to reach the area have been inhibited.

Johnson said city crews are building a road down into the swamp to see if and where the break has occurred.

Members of the Bureau of Pollution Control are almost certain that a break has occurred in a sewer main some 300 feet from a lifestation behind Hancock General.

Joe Captain, pollution control technologist with the Ocean Springs branch of the bureau, stated he traveled up the bayou in a rubber raft last

Tuesday and discovered what he thought was raw sewage "gushing" up into the swamp.

Captain estimated some 100 to 150 gallons of waste are being pumped out of the break every minute.

Since the sewage flow comes from underwater, Captain could not say without question if the gushing is the result of a sewer main break.

However, "There are two reasons why I'm pretty sure it's a sewer main break," Captain said.

"One, because it's directly on line with a lift station behind the hospital, and also because the flow out of the Bay

### Jury Selection to begin Monday

## Circuit Court scheduled to hear some 295 cases

By BRENT MACEY  
Some 26 criminal cases and 200 civil cases are listed on the docket of cases to be heard in Hancock County Circuit Court when jurors are selected here Monday.

A new Grand Jury will also be selected for the scheduled three week term. District Two Circuit Court Judge Kosta Vlahos will preside over both courts during the session.

Motions are expected to be heard July 17 in the case of James Billiot, accused of the triple homicide slaying of three relatives in the Delta Community on Thanksgiving Day.

Billiot is charged with three counts of capital murder and will be represented by Public Defender Yvonne Chapman Sills and Bay St. Louis Attorney Nicholas (Mac) Haas.

The trial of Billy Sills, Hancock County School District superintendent, is set for July 23.

Sills is accused according to a grand jury indictment of having conspired with an associate to defraud the Gulfport Electric Light and Power Co. of \$2,500 to \$5,000 by falsifying bills.

Sills is represented by Gulfport Attorney Richard Dymond.

Gulfport Attorney Royce Hollman will represent Hancock County Circuit Court Judge O. H. Gill, which is expected to be heard in the term although no schedule has been filed on the court docket.

Other cases scheduled for trial include the case of a man charged with kidnapping, rape, burglary of a dwelling and carrying a concealed weapon after conviction of a felony, is set for July 19.

Garcia is accused of kidnapping a teenage couple and raping the girl, who was a juvenile, at gunpoint.

The trial of Fanny Dill Johnson, a former Hancock County Youth Court employee accused of forging 24 checks while working for the office, is set for July 30.

Nells C. Sand Jr., a former Bay Police Officer accused of conspiring to blind or cripple a man who allegedly

counted kidnapping, rape, burglary of a dwelling and carrying a concealed weapon after conviction of a felony, is set for July 19.

Garcia is accused of kidnapping a teenage couple and raping the girl, who was a juvenile, at gunpoint.

The trial of Fanny Dill Johnson, a former Hancock County Youth Court employee accused of forging 24 checks while working for the office, is set for July 30.

Nells C. Sand Jr., a former Bay Police Officer accused of conspiring to blind or cripple a man who allegedly

owed money to a former hotel owner in Bay St. Louis, is scheduled to be arraigned July 16.

A trial for Jack Berry, accused of setting the Hancock County Jail on fire while he was incarcerated for several other charges, is set for July 14.

Berry's trial for charges of burglary of a dwelling, receiving stolen property and grand larceny (auto), is set for July 14.

The trial of Jimmy M. Bufford, a juvenile accused to two counts of possession of a controlled substance, is set for July 15.

Several commissioners agreed with Frierson at the time.

However, Wilson Webre, executive director of the commission, noted the supervisors approved having ADI prepare the preapplication in February—before the recent disagreement.

He argued the preapplication must be submitted to FAA soon if the commission has any hopes of obtaining

Nothing was being gained, he said, and stated the commission of two representatives apply and hope to be heard to have local county tax payers foot the bill for construction of the bridge.

Smith entered the meeting some 20 minutes after the commission finished discussion of the claim about pay-

owed money to a former hotel owner in Bay St. Louis, is scheduled to be arraigned July 16.

## Explosion damages shrimp boat

By BRENT MACEY  
An early morning explosion and fire rocked a boat at a local boat yard in Bay St. Louis Saturday according to East Hancock Fire Administrative Chief Billy Field Jr.

The Hancock County sheriff's office received a call at 7:43 a.m. reporting the explosion at a shipyard off Blue Meadows Road.

Field said "Steve Delgrepoint was doing some welding inside a shrimp boat at the boat works. Inguil-

lating, he was caught with a small explosion.

Delgrepoint was injured, but the burning boat was not damaged, which

was quickly extinguished by the

## Man charged in sexual assault of 5-year-old

By BRENT MACEY  
A 65-year-old Bay St. Louis resident charged with sexually assaulting a five-year-old girl Thursday is currently in Hancock County Jail under a \$25,000 bond.

Hancock County Sheriff Ronald Peterson stated Leo Bernard of Rte 1 Box 122 Bay St. Louis was arrested at 5 p.m. in a house located behind the C. Paddy Louie in the Kiln.

According to Peterson, three

The girl was taken to Hancock County General Hospital for treatment. An examination was performed by a local physician. The child was released later that same evening.

A preliminary hearing has been set July 21 before Judge O. H. Gill. Bruce Neenan, Bay St. Louis

# Obituaries

**MRS. GEORGE BEARD**  
Mrs. George Rogers Beard, 79, of 118 Camella Drive in Pass Christian died Saturday, July 10, 1982 at Gulfport Memorial Hospital.

She was born in Little Rock, Ark., a member of Trinity Episcopal Church in Pass Christian and a resident of that city for more than 30 years.

Mrs. Beard lived in Ocean Springs for three years before moving to Pass Christian and prior to that had lived in New Orleans for a number of years.

She is survived by two daughters, Mrs. Elizabeth Beard Blue of Metairie, La. and Mrs. Anne B. Douglas of Columbus, Ga.; six grandchildren; and four great-grandchildren.

Funeral services will be at 1 p.m. Sunday at Trinity Episcopal Church.

Graveside services will be a 3 p.m. Sunday at Metairie Mausoleum in New Orleans.

## BRYAN CRANE

Bryan Keith Crane, 13, of 2556 Bohn St. in Mobile, Ala., died Thursday, July 8, 1982 of injuries sustained in a motor vehicle accident on the I-10 bridge over Pearl River in Hancock County.

The body was transferred from Edmond Fahey Funeral Home in Bay St. Louis to Belmont Funeral Home in Mobile for services and burial in that city.

Survivors include his father, John W. Abraham Crane of Mobile.

## HILTON FAIRCONNETUE

A rosary for Hilton Fairconnetue was recited Friday at 8 p.m. at St. Rose de Lima Catholic Church in Bay St. Louis, where a wake was held until 10 p.m.

Burial was Saturday at 10 a.m. in St. Mary's Cemetery in Bay St. Louis.

Mr. Fairconnetue, 70, a resident of Bay St. Louis, died Monday, July 5, 1982 in Biloxi.

He is survived by three sons, Kurt Fairconnetue of Slidell, La., Filton Fairconnetue and Darryl Fairconnetue, both of Los Angeles, Calif.; two daughters, Mrs. Beverly Jean Black of Englewood, Calif., and Miss Gutchen M. Fairconnetue of Los Angeles; a sister, Mrs. Julia Hall of Chicago; and five grandchildren.

J.T. Hall Funeral Home in Gulfport was in charge of services.

## MRS. REBECCA GODWIN

Mrs. Rebecca Perkins Godwin, 40, wife of Thomas H. Godwin Sr. and a resident of 301 Ballentine St. in Bay St. Louis, died Thursday, July 8, 1982 in New Orleans.

Visitors called Friday evening at Edmond Fahey Funeral Home in Bay St. Louis.

Her funeral was conducted Saturday at 10 a.m. from the funeral home chapel, followed by burial in the Lakeshore Cemetery.

Mrs. Godwin, a native and lifelong resident of Bay St. Louis, was the daughter of Joseph Perkins and Mrs. Marvinna Garcia Perkins of Waveland. She is also survived by two sons, Thomas Godwin Jr. and Brock Godwin; a daughter, Miss Terry Godwin, all of Bay St. Louis; two brothers Robert Perkins and John Perkins, both of Waveland; and a grandchild.

## EDWARD G. KELLY

Edward G. (Jim) Kelly, 76, died Friday, July 9, 1982 at his residence in Pearllington.

Arrangements are incomplete at Riemann Funeral Home, Bay St. Louis.

## CHARLES P. LOGAN

Charles Peter Logan, 46, 10 Sherman Drive, Pass Christian, was pronounced dead on arrival at Hancock General Hospital Thursday morning, July 8, 1982.

Mr. Logan, a certified public accountant, was a native of Natchez and had been a resident of the Coast since 1944.

He was a member of St. Paul's Catholic Church in Pass Christian.

He was graduated from St. Joseph High School in Pass Christian and Loyola University, New Orleans. He was president of the school board of St. Paul's Catholic School, a member of the American Institute of CPAs, and served as alderman for the City of Pass Christian for eight years.

He is survived by his wife, Mrs. Janice Fife Logan, Pass Christian; three daughters, Miss Charlotte Ann Logan, Miss Lisa Logan, and Miss Joanna Logan, all of Pass Christian; his mother, Mrs. Gabriella Byrne Logan, Pass Christian; three brothers,

Henry Byrne Logan and Fred Logan, both of Pass Christian; and William E. Logan Jr., Lafayette, La.; and four sisters, Mrs. Karl (Gambella) Pellingue, Port Barre, La., Mrs. Keith (Margaret) Hardie, and Mrs. Art (Mildred) Burress, both of New Orleans, and Mrs. Gordon (Carolyn Ann) Mills, Lafayette, La.

Friends called Thursday from 6 to 9 p.m. at the Riemann Funeral Home chapel in Pass Christian where recitation of the Rosary was at 8 p.m. Mass at St. Paul's Catholic Church was celebrated at 4 p.m. Friday.

Burial was in Live Oak Cemetery.

## KENNETH NECAISE

Mr. Kenneth Wayne (Dooley) Necaie, 40, of 319 41st St. in Gulfport died at Gulfport Memorial Hospital Saturday, July 10, 1982 after an extended illness.

He was a native and lifelong resident of the Mississippi Gulf Coast and a maintenance technician for duPont's Delisle Plant.

Mr. Necaie was a former coach in the Jefferson Parish, La. School System, attended Pearl River Junior College in Poplarville and William Carey College in Hattiesburg and graduated from Hancock North Central High School where he was a member of the state championship basketball team.

He was a member of Pass Road Baptist Church in Gulfport.

Mr. Necaie is survived by his wife, Mrs. Marietta (Sue) Parker Necaie of Gulfport; one daughter, Miss Amy Cheryl Necaie of Gulfport; his mother, Mrs. Bessie Shaw Necaie of Perkinston; two brothers, Elroy Necaie of the Steep Hollow Community and Guy Lynn Necaie of Gulfport; three sisters, Mrs. Janell Wilson of Gulfport, Mrs. Nelda Gay Ladner and Miss Sharon Necaie, both of Perkinston; his grandmother, Mrs. Purcell Shaw of Perkinston.

Friends may call from 6:30 p.m. until 10 p.m.; Sunday evening at Riemann Funeral Home in Gulfport.

Funeral services will be at 2 p.m. Monday at Pass Road Baptist Church where the body will lie in state one hour before service time.

Burial will follow at Crane Creek Cemetery in Hancock County.

## H. FORD PARKER

H. Ford Parker, 67, 522 Bay View St., Pass Christian, died Wednesday, July 7, 1982 in Memorial Hospital at Gulfport.

Mr. Parker, a co-manager for a TG&Y store, was a native of Covington County and had lived in Pulaski, Tenn., prior to moving to the Coast seven years ago.

He is survived by his wife, Mrs. Mary Croeland Parker, Pass Christian; two sons, James C. Parker, Gulfport, and Richard G. Parker, Dallas; three brothers, David K. Parker, Gulfport, John W. Parker, Atlanta, and A.C. Parker, Jackson, La.; two sisters, Mrs. C.S. McCoy, Petal, and Mrs. Jack Anderson, Long Beach; and five grandchildren.

Graveside services were held at 1 p.m. Saturday in the Hillcrest Cemetery in Petal.

Riemann Funeral Home in Gulfport was in charge of arrangements.

# Bridge grate said cause of fatality

By NANCY KENNY  
An apparently dangerous condition on the I-10 bridge over the Pearl River was cited as the cause of a fatality on the structure late Thursday afternoon.

Hancock County Coroner Carl Banderet said the grate is "extremely dangerous whenever it rains."

The official said the metal grillwork at the top of the spans is considered by officials to have been the cause of numerous accidents at that spot on the bridge.

Thursday's accident, in which the driver of a motorcycle lost control of his vehicle on the grate during a shower, claimed the life of a 13-year-old son who was a passenger on the machine.

Pronounced dead at the scene by Banderet of massive head injuries was Bryan Keith Crane of 2556 Bohn St., Mobile, Ala.

The youth's father and driver of the motorcycle, John W. Abraham Crane, 35, of the same address, was admitted to Slidell Memorial Hospital where he was reported in stable condition.

John Crane sustained a broken leg and fractured ribs in the accident, according to Mississippi Highway Patrolman David Kenny who investigated the incident.

Kenny said the Crane boy was ap-

parently a passenger in the motorcycle when it was struck by the grate.

No other vehicles were in the accident, Kenny said.

Banderet noted the truck, driven by Banderet, was on the I-10 bridge at the time of the accident.

The truck was on the bridge at the time of the accident, Banderet said.

Kenny listed time of the accident as 4 p.m. in a light rain.

Eastbound traffic was stopped for several minutes as a result of the accident, Banderet said.

The Crane family moved from Houston, Texas, to Mobile, Ala., in 1979.

Banderet warned motorists to be especially careful when crossing the bridge in question anytime during or immediately following a rainfall, regardless of intensity.

"There have been a lot of accidents on that bridge because of that grate and its past time when the Highway Department should do something about replacing it," Banderet pointed out.

He said he does not feel warning signs would be the solution.

"They've got to do something about correcting the conditions before someone else is killed," the coroner warned.

# There's An Answer

By Norman Vincent Peale and Ruth Stafford Peale

Is there a cure?

I am a college student with a speech difficulty and I'm worried about whether it will affect my business career. Can you suggest a cure or a way to overcome the trouble?

A. There are of course various kinds of speech problems. We can only assume that yours is a matter of stuttering or stammering, or perhaps a lisp. Because the difficulty is psychological rather than physiological, in other words, emotional in nature. It could be based on an unconscious fear of meeting people or a deep lack of confidence in yourself. Most people who have this difficulty are supersensitive to the reactions of others.

Speech training might help. We suggest that you consult a speech therapist or a psychological counselor. And because such problems are often related to inner tension we are sending you our booklet entitled "Stop Worrying and Start Living." If any other readers would like a free copy please write to us at Box 500, Pawling, N.Y. 12564.

Too old for romance?

Q. I am a widow with two teenage daughters. I plan to marry a widower with teenage sons. His boys like me and want their father to marry me, but my girls say they will run away from home if I marry.

They say it is disgusting for me to have a romance at my age. In this marriage I can look forward to a future of happy companionship, and I cannot give that up. What shall I do?

A. Your daughters think of you as a mother rather than a woman. In their thinking a mother cannot have romantic, much less sexual, feelings. If you know your own heart, simply tell your daughters that while you are a mother you are also a woman in love. Tell them not to worry—that you will remain their mother.

## Companies

CONTINUED FROM PAGE 1A

dollar operations," he said.

"But when a man comes with cold cash for basic services or to buy land, they (the commission) don't know what to do," Breau said.

He said the chamber Board of Directors discussed undertaking a project to encourage service industries to locate here, but got out of hand and stopped doing it.

Breau feels offshore drilling will definitely have an economic impact along the Gulf Coast, but he does not know exactly where the majority of this companies will locate.

"We're talking about quite a few support industries for oil rigs in the Gulf. All these businesses would have to move offices close by which would result in land sales, increased rentals, building construction, higher pay scales and more people would naturally move here," he explained.

When asked if the shores of the Bay of St. Louis could be utilized for oil rig work and crew boats, Breau said, "It could be, but I don't think these boat companies would use the Bay because they would have to negotiate two bridges."

But he revealed that about six months ago several oil service industries purchased ship boat docks in the Back Bay Biloxi area for such operations.

Breau reports he has discussed problems, oil service industries are experiencing in Hancock with the County Board of Supervisors.

"These companies would prefer a good docking facility such as Port Bienvenue, but we've received no cooperation as witnessed before," he stated.

"Some of these industries tried to come into Hancock, but they located in Pass Christian," he stated.

"Companies that come would just as soon come out of Biloxi or Mobile if they have problems establishing here," Breau reported.

"It's going to have to be the local people who are going to have to go out, invite these industries here and let them know we want them," he stated.

Breau said the commission would be the appropriate agency to seek out these industries, because that agency has a paid staff to undertake such a project.

The chamber president, who is a former commission member, said the industrial development agency has become more interested in industrial real estate rather than seeking jobs for local residents by encouraging labor intensive companies.

"We discussed doing this with the chamber board, but we can't encourage these industries unless the majority of the members are behind us," he stated.

Blaock reported there will be more offshore lease sales, but he does not know when these will be offered.

The department director said all leasing in the immediate future will offer tracts located five to eight miles offshore.

"Leases in areas such as the Bay of St. Louis are way in the future. Present regulations require that rigs be placed no closer than one mile from the islands and those same principles will apply to operations near the shoreline," Blaock stated.

## Flow

CONTINUED FROM PAGE 1A

St. Louis sewage lagoon is the lowest I've ever seen."

Captain said he came to Bay St. Louis a week ago last Friday because of a complaint received by the Jackson bureau from a Bay resident.

He was in a truck that Friday but returned Wednesday with a rubber raft to inspect the area.

Johnson stated neither he nor city workers have attempted to wade into the swamp to discover if the leak exists. "We can't get to it. Between the quicksand, snakes and bogs we'd be likely to lose a man trying to get in there."

For this reason a road is being built into the swamp. Johnson said city crews have been storing loads of dirt in an area near the pumping station for the past year, and that material is being used to extend a roadway to the break site.

More dirt will have to be deposited and then pushed into the swamp to construct the road.

He expected the road to be completed by Friday.

According to Johnson the line in question is a six-inch sewer main.

Sewage in the main is drained from an area south of Felicita and north of US-90. The area includes Hancock General Hospital and North Bay Elementary, Johnson said.

Although Captain said the Jackson office of the Bureau of Pollution Control would be notifying Bay St. Louis of the problem, Johnson said he had not been notified as of Friday.

Captain claimed the bureau would set a time frame to establish when the work should be finished.

But Johnson claimed the city doesn't need the bureau to establish any time

frame to fix the break.

"This is just a routine sewer break. It happens all the time all over the country."

"When we investigate it and find out what the problem is then we'll fix it," he said.

"I don't see what the big deal is."

Captain said repair work will be difficult since the break is in a swampy area.

Neither Johnson or Captain knew when the leak occurred.

However, Dave Peranich, a Cedar Point resident and a trustee at Hancock General, claimed he first noticed raw sewage June 9 in the bayou by the Yacht Club.

Captain stated he did not take any water samples from the Bay of St. Louis when he visited the area and did not know how polluted waters in the bay had become.

The swamp area apparently could remain polluted for quite some time.

"It would take quite a while after the main is fixed before the water will clear up, unless there's a real heavy rain," Captain said.

He noted the swamp contains stagnant waters which are agitated only by rising and falling tides.

## Flasher charged

\$261 in Waveland

By ELLIS CUEVAS

A 73-year-old Chalmette man was arrested Wednesday for indecent exposure and fined \$261 by Waveland City Judge Lucien Gex Thursday night, according to Waveland Investigator Robert (Boo) Harty.

The investigator said, "We received a complaint from a woman about a man exposing himself on the beach near Buccoo Bay State Park. They gave us the name of the man, and he told us it was a man named Ernest Harty."

Harty, who lives at 1014 Hancock Street, was arrested Wednesday night at 11:30 p.m. by Waveland City Police Officer Gex. Harty was charged with indecent exposure and fined \$261, Harty said Saturday.

Harty said he was arrested while walking on the beach near Buccoo Bay State Park. He said he was walking with a group of people and was arrested while they were watching a movie.

Harty said he was arrested while walking on the beach near Buccoo Bay State Park. He said he was walking with a group of people and was arrested while they were watching a movie.

## Arrest

CONTINUED FROM PAGE 1A

"An investigation by the Sheriff's Department and the Gulf Coast Security Services at Diamondhead led to the arrest of the juvenile," Ladner said.

"During the investigation a sheriff's deputy posing as an insurance salesman from Jackson bought 200 various pills of a controlled nature from the youth," Ladner reported.

The youth is being held under no bond at the Hancock County Detention Center pending a hearing at the Youth Court.

"Two felony charges are currently pending against the same youth," Ladner added.

Deputies Nathan Hoda, David Murtagh, Ray Murphy and Diamondhead Security Chief Delbert Ashcraft and Captain Rodney Aguzin were involved

in the investigation.

### CAR THEFT CHARGE

A Bay St. Louis man was in Hancock County jail Friday under a \$5,000 bond following his arrest in Louisiana on charges of grand larceny car theft.

Hancock Sheriff's Department Investigator Delbert Seay reported Stephen Allen Southerland of Rte 1 Box 662B Bay St. Louis allegedly stole a car owned by Roland Blackwell of Jourdan River Shores July 1.

Southerland was arrested Friday by law enforcement personnel in Clinton, La. and was transported back to Hancock County by Seay that same day.

In addition to the grand larceny charge, Southerland is also charged with a parole violation.

## Immediate action needed on sewer break

An investigation into foul smell coming from a bayou emptying into the Bay of St. Louis adjacent to the Bay-Waveland Yacht Club reveals an apparent sewer line break a few hundred feet from the State Board of Health's office on Dunbar Avenue.

One resident of the Cedar Point area told us Thursday he personally saw raw sewerage emptying into the Bay on June 9 upon returning from a shrimping trip.

Joe Captain, pollution control technologist out of the Ocean Springs office on Tuesday used a rubber raft in the bayou and discovered what he thought was sewerage 'gushing up' in the water.

The technologist estimated 100 to 150 gallons of waste as being pumped out of the break every minute.

We feel this is a tremendous amount of raw sewerage being dumped into our Bay each day, when you multiply minutes by 60 for an hour, then by 24 for each hour of the day.

There are a lot of questions we, as well as the residents of Cedar Point would like to ask.

.....Is the water safe for fishing off the dock of the Bay-Waveland Yacht Club, by the bridges on the seawall, the mouth of the Jourdan River, and so on?

.....What effect does the raw sewerage having on people swimming in the Bay?

.....There are many crab pots in the Bay, does the raw sewerage effect the crabs caught in them?

.....Persons with boats staying in the water, will there be an effect on the bottom of these?

.....Will there be an effect on the oyster beds between the two bridges?

.....Why hasn't Bay St. Louis been notified by the State Bureau of Pollution Control's office of the break, after their inspection almost a week ago?

.....Is it safe to eat shrimp caught in the Mississippi Sound?

.....When will a coffer dam be constructed to catch the flowing sewerage to keep it from continually polluting the Bay?

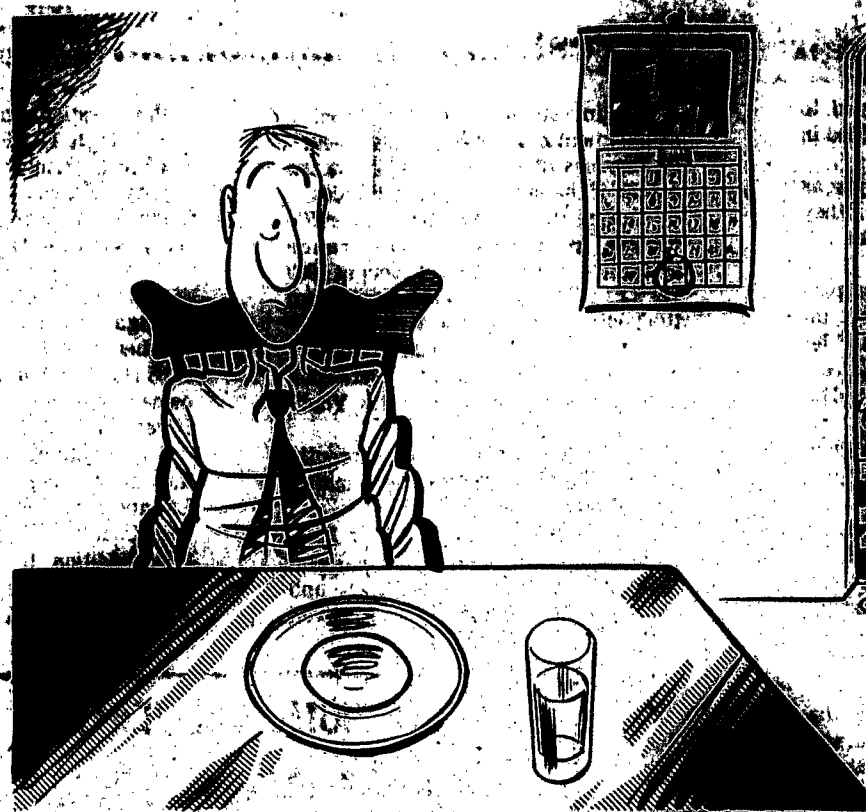

.....Why did it take over a month before someone found the origin of the possible pollution?

.....How long will it take before the waters of the Bay are safe?

These and many more questions should be answered very soon by persons with the responsibility for the safety and welfare of our citizens.

All Cedar Point residents, Bay-Waveland Yacht Club members, boat owners, as well as everyone in our area should be concerned with this matter.

If this is a broken sewer line emptying into the Bay, it is an emergency requiring immediate action.

By Ellis Cuevas

### Bits 'n pieces

There was a lot of action at McDonald Field this week with the nine and ten-year-old Little League tournament.

This week the tournament for 11 and 12-year-olds will be at the Elwood Memorial Park in Waveland.

We hope those who like baseball will visit the park and see the play of these young people.

There were some very close games in the play last week in Bay St. Louis and will probably be more in Waveland this week.

You local all-star teams need your support.

The annual Our Lady of the Gulf Church Fair continues through tonight in Bay St. Louis.

If you are out driving and want to get some good food and met some of your old friends, you may want to visit the fair tonight.

Many hours of preparation have gone into making this fair a success by members of Our Lady of the Gulf.

The re-organization of the Bay St. Louis Junior Police Auxiliary, we feel is a very good program.

We hope everyone will give their support and help so the re-organization will be a benefit to the young boys and girls in addition to the City of Bay St. Louis.

We have a lot of very fine young boys and girls in our communities, and you never hear too much about their efforts.

We know the ones in trouble with the law are those usually getting the publicity, (and we are the ones who give it to you), but, hope we will be able to give our readers some good news on this fine group.

Bay Mayor Larry Bennett, Chief of Police Douglas Williams, and Patrolman Murray Ladner are to be commended for thinking about our youth.

A meeting is planned for Tuesday night in the conference room of Gulf National Bank at 7 p.m., and persons interested are urged to attend.

In talking with Chief Williams Friday there are still a few slots open for persons qualifying.

### Senator Thad Cochran

SPECIAL REPORT:

#### The Insanity Defense

Many people in our country are deeply disturbed about the insanity defense. Some states have already provided for the kind of verdict. I think the federal law ought to be changed in this regard also.

Victor's District of Columbia found the assailant of the President and three other men not guilty by reason of insanity, which waves away through the Senate, too.

Immediately, hearings were begun in the Senate Judiciary Committee in an effort to develop a new standard which criminal acts should be judged. But the insanity defense in the Hinckley case was being questioned along with some of the witnesses who testified at the trial.

The insanity defense is a controversial issue. It is a defense that allows a person to be found not guilty if they are found to be insane at the time of the crime. This is a complex issue that has been debated for many years.

## Letters to the Editor

### Student lauds small school's 'love and care' for individuals

Dear Sir:

I would like to congratulate the staff, students and especially Rev. Charles Clark of Trinity Christian Academy in Waveland for a great year.

The school may be small in size but is great in love and concern for each and every student.

I hope the school will grow and prosper to be something great.

And with God's help and the help of many loving people it will.

Good Luck Lions!

Sincerely,  
Tina Gatlin  
Bay St. Louis

#### LETTERS POLICY

The Sea Coast Echo welcomes comments from its readers on subjects of general interest. Letters must be signed and include address or phone number so that the sender can be contacted by the newspaper if necessary. Letters should be brief, preferably typewritten and double spaced, and conform to standards of good taste. Letters of thanks and expressions of appreciation are considered inappropriate for the Letters To The Editor columns.

#### USED CARS AND THE FTC

When I was a youngster, I can remember going with my father to the local used car dealer to buy a family automobile that was never newer than the one we had.

My father would talk to the salesman and then go over very inch of the prospective purchase with an eye trained by the experience of adulthood. He would check under the hood, looking at the various engine parts. He would kick the tires and examine them for wear. He would check the car's underbody. He would check for rust and for exterior damage. He would make sure the lights, battery, turn signals and other parts of the electrical system were in working order.

Above all, he would take the car on a test drive and judge its performance for himself.

I learned his care was necessary because there were no guarantees on a used car until the new car of today.

Now, when I think of this procedure, I am amazed that it has been replaced by the "lemon law" which allows a consumer to return a car to the dealer if it has a certain number of defects.

While this may seem like a good idea, it is not. It is a law that allows a consumer to return a car to the dealer if it has a certain number of defects. This is a law that allows a consumer to return a car to the dealer if it has a certain number of defects.

While this may seem like a good idea, it is not. It is a law that allows a consumer to return a car to the dealer if it has a certain number of defects. This is a law that allows a consumer to return a car to the dealer if it has a certain number of defects.

While this may seem like a good idea, it is not. It is a law that allows a consumer to return a car to the dealer if it has a certain number of defects. This is a law that allows a consumer to return a car to the dealer if it has a certain number of defects.

regulation. There were those who immediately suggested that campaign contributions from the industry led to the vote, which they viewed as anti-consumer.

That's ludicrous. The regulation simply went too far and would have been too great a burden on used car buyers and sellers.

In fact, unlike portions of the rule which suggested that consumers inquire about the car's history, the regulation required that the dealer provide a written statement of the car's history.

This is a regulation that is more than adequate to address the problem of used car sales.

Unfortunately, the regulation is not a requirement of the regulation. It is a regulation that is more than adequate to address the problem of used car sales.

To be safe from a 10,000-mile most dealers who are small businesses would have had their cars inspected and simply passed the test to the consumer.

It is a regulation that is more than adequate to address the problem of used car sales.

It is a regulation that is more than adequate to address the problem of used car sales.

It is a regulation that is more than adequate to address the problem of used car sales.

## CONSUMER REPORT

### FUNERALS

Attorney General Bill Allain says that the third largest purchase most consumers make after a home and an automobile is a funeral.

Although consumers may be given itemized bills or quoted itemized prices, people rarely know anything about funeral procedure or expenses until they are forced by circumstances to make hurried decisions which they may regret.

Allain states that both confusion and extra expenses may be avoided by adequate planning; bereaved survivors may not choose wisely or may be led to spend more than they can afford.

A typical funeral is often sold on a package basis. The package ordinarily includes the following:

—Professional service fee for the mortician and staff;

—Transportation of the remains to the funeral home;

—Embalming procedure;

—Casket;

—Arranging for newspaper obituaries;

—Securing various permits;

—Use of the facilities, including the visitation room;

Arranging flowers;

Guestbook and acknowledgment cards

Purchasers of funeral services who have complaints can now turn to ThanaCap, a nationwide consumer action panel established by the National Funeral Directors Association.

If you have a complaint or just want information and literature, write or call ThanaCap, 200 West Wells Street, Milwaukee, WI 53203; telephone 414-276-0788.

For additional information contact Attorney General Bill Allain, Consumer Protection Division, P.O. Box 220, Jackson, Mississippi 39205; telephone: 961-4244.

# Commissioner overrules professor's testimony

Mississippi Public Service Chairman Lynn Havens Thursday struck testimony by a key witness for opponents of a proposed high-voltage transmission line across the northern and central Mississippi counties.

In addition, the proposed 500,000-volt line would also travel through Jackson County from the power company's Plant Daniel, across Hancock, Hancock and Pearl River counties to the facilities of Gulf States Utilities in Louisiana.

In the final day of the third public hearing, the commission has held on construction of the power line proposed by Mississippi Power Company, Havens disallowed portions of testimony offered by Dr. Edwin Beck, engineering department head at Tulane University in New Orleans, La.

Havens exchanged during the hearing record those portions of Beck's testimony alleging such high-voltage lines are harmful to plant, animal and human life.

Havens' move came as a surprise to the opponents of the powerline construction who have been led in their fight by residents of Hancock and Pearl River counties.

The ruling may have speeded up the end of the hearing, since power company attorneys had prepared several hours' worth of testimony to dispute Beck's statements.

As a result, south Mississippians who have been fighting Mississippi Power Co.'s plans to erect the high-voltage transmission line will learn next week whether or not the state will approve the project.

But no matter who wins, the case is likely to wind up in court, one attorney involved in the case says.

Eric A. Holden, representing Hancock County property owners John and Joe Ann Lindner, said, "Whoever wins, this is going to be appealed."

The commission concluded its third

hearing on the proposal Thursday, and PSC chairman Lynn Havens of Gulfport said the state agency would rule by Wednesday on Thursday of this week.

In June, Beck had told the three-member commission that scientific studies had linked extra high-voltage lines to health side effects such as reduced immunity levels, joint tenderness and more easily broken bones.

In May, Mississippi Power presented a Rochester, N.Y. professor, Dr. Edwin Carstensen, and a Pennsylvania engineer, Mike Silva, who testified that the line was no threat to humans.

In asking that Beck's testimony be stricken, power company attorneys objected that Beck's specialty was in physical science, not in the medical field.

The opponents' attorney argued that neither Carstensen nor Silva were medical doctors, and both had given observations on the biological effects of the line.

While the commission nixed Beck's testimony on the medical side effects, Havens said his analysis of the line design would remain under consideration.

"There's (in Beck's presentation) other significant testimony on engineering and design," Havens said.

Beck had testified in June that the power-line design would violate the National Electric Safety Code.

According to Beck, MPC furnished calculations of safety conditions surrounding the proposed line underestimated the voltage that would travel through the line and the electrical field strength that would surround the structure.

He calculated that a tractor-trailer traveling under the line would produce 7 milliamperes of current at 120 degrees Fahrenheit, 2 milliamperes above the maximum safety-code limit.

A milliamperage is a unit of measuring electrical current.

To cross-examine Beck, Mississippi Power brought in Tom Watson, a Washington, D.C. attorney whose law firm specializes in public utility cases. Watson has cross-examined Beck at powerline hearings in North and South Dakota.

After Beck's testimony ended power company utilities recalled Silva to the stand to take issue with Beck's criticisms of the line design.

Silva denied that the utility had underestimated the voltage strength to travel through the line, but argued that a 5-milliamperage charge was not critical anyway.

The Gulfport-based utility and other affiliates of the Southern Co. electric system propose building the 500,000-volt line to sell excess energy to Gulf States Utilities, which operates in Louisiana and Texas.

The 77-mile line would run through northern Hancock County from the Plant Daniel generating facility in Jackson County to the Mississippi-Louisiana line at the western edge of Pearl River County. The line also would cross Harrison County.

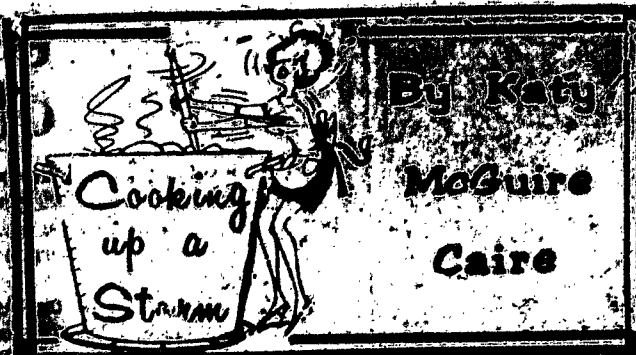

The Mississippi segment of the line would connect with a 63-mile section that would run westward into Louisiana.

After the utility announced its plan, affected landowners objected to the use of their property for an out-of-state enterprise. Opponents also have claimed that the line would pose a medical hazard and devalue real estate.

The utility has countered that the line to the Gulf States system would increase Mississippi Power's reliability.

Besides the line, an organized opposition group, called South Mississippi Residents for Orderly Development, has fought Mississippi Power during the hearings on the line.

Testimony in the case ended Thursday afternoon; previous two-day hearings were held on Monday and Tuesday.

The mark of a truly good cook shows itself not so much in fussy, fancy, expensive dishes as it does in presentation of inexpensive dishes made special through creative touches and use of skilled techniques and flavor combinations.

Thrifty cooks have long "tamed" the toughness of less expensive cuts of beef by marinades to enhance flavor, and by use of wines and broths for braising the less tender cuts.

And again and again these thrifty cooks count on their bowls of fluffy rice to extend the servings of meat.

Consider that impressive classic of steakdom - Steak Diane. You needn't weep at memories of Steak Diane as you pass up the King's Ransom price tags on the top steaks at the market - that good old standby, round steak - properly tenderized - and accented, fills the bill - without running the grocery bill sky high.

I usually prefer to tenderize meat by marinating in olive oil, Burgundy wine and pepper, and I have used red wine vinegar for the purpose at times. Braising in broth and wine also does the trick, but if you prefer to use a meat tenderizer that's fine, too.

And if you delve into the brandy bottle for generous splashes - for the steak, not for you - and add the touch of mushrooms or tomatoes, you have a special dish to serve with pride. Here's

**SKINFINT GOURMET'S STEAK DIANE**  
1½ to 2 lbs. top round steak, an inch thick  
¼ cup butter or margarine  
¼ cup brandy  
½ cup sliced green onions  
1 tsp. each Worcestershire sauce, Tabasco (less if you like milder taste.)  
Dash of pepper or lemon pepper, salt (optional)  
Cut the steak into six portions, and pound down with a

mallet or the rim of a saucer till they're about a half inch thick.

At this point, you may marinate the meat in red wine and oil for a hour or more, or you may go ahead without waiting that long by sprinkling with unseasoned meat tenderizer according to package directions.

Melt three tablespoons of the butter over high heat in large skillet, and as soon as it's bubbly, sear the steaks quickly on each side, just a minute or so per side.

Lower the heat to medium, splash the brandy over, along with the hot sauce, onions, and pepper.

Cook steaks until done to your taste.

Remove the steaks from the pan and keep them warm while you add the remainder of the butter to the sauce in the pan and stir together. When the butter is melted pour over the steaks and serve along with rice. If you're feeling fancy, toss some almonds or other nuts into the rice.

I have successfully used underblade chuck steaks tenderized and pounded thin for this version of Steak Diane.

And when the budget's really low, what's wrong with Hamburger Steak Diane?

HOME DESTROYED—Bay St. Louis Fire Chief Andrew Lizana on top of ladder has wrecking bar passed to him from Lt. Alphonse Sheppard to open ventilation at gable end of roof to see if fire is out in loft of vacant house in the 400 block of Webster Street on Thursday night. The fire apparently started from kids playing with candles and matches according to Lizana who says he still investigating the origin and has to question some more people. A dozen Bay firefighters were assisted by three from East Hancock responded to the house fire which was completely in flames when reported. The house was completely gutted by the fire Lizana said. (Staff photo by Ellis Cuevas).

## Political scientist analyses UN expulsion procedures

**EDITOR'S NOTE:** The following article, entitled "The Expulsion of Israel from the UN by David Keithly who has an M.A. in political science and history from the University of Freiburg and is currently teaching political science at Lynchburg College in Virginia is furnished to The Sea Coast Echo by Public Research, Syndicated of Claremont, Calif.

In late April Syria issued a call for Israel's expulsion from the United Nations. The proposal did not get very far then, but in the wake of the Israeli invasion of southern Lebanon it could gain momentum.

The resolution declares that Israel is in continuous violation of the UN Charter because it is not a peace-loving nation.

According to Syria, Israel constitutes a threat to peace and engages in acts of aggression. The resolution invokes Chapter VII of the U.N. Charter which calls upon the U.N. to take "action with respect to threats to the peace, breaches of the peace and acts of aggression."

The adoption of such a resolution would set an unfortunate precedent and would result in a serious undermining of the integrity of the U.N.

The General Assembly is not empowered by the U.N. Charter to suspend or expel any member of the organization, and such an action would itself represent a violation of the Charter for a number of reasons.

While it is often argued, as Syria undoubtedly does, that Article 21 of the Charter vests with the General Assembly the power to adopt its own rules of procedure—and that therefore this body is empowered to exclude Israel as a non-peace-loving state, the General Assembly certainly is not entitled to act in a way which would contradict other provisions of the Charter.

According to Chapter VII of the Charter, it is the Security Council which is authorized to take action on its own initiative, or at the request of any of its members, to maintain or restore international peace and security.

As stated in Articles 10 and 14 of the Charter, which outline the functions and powers of the General Assembly, this body may recommend to the Security Council measures for the peaceful adjustment of any dispute.

The General Assembly is not empowered to undertake action on its own initiative, or at the request of any of its members, to maintain or restore international peace and security.

According to Chapter VII of the Charter, it is the Security Council which is authorized to take action on its own initiative, or at the request of any of its members, to maintain or restore international peace and security.

Nations as an attack on Israel. Members of the U.N. who care about the organization's future, therefore, should fervently oppose the Syrian resolution.

## New Briefs

**INVESTMENTS**  
"The Money-makers," the new 13-part series featuring financial planner and lecturer Venita VanCaspel, will be rebroadcast this summer at 1 p.m., Sundays, beginning July 11, on the Mississippi ETV Network.

Each 30-minute program features Ms. VanCaspel with two economic or business leaders who share their expertise in investment areas such as real estate, energy and the stock market. Other programs examine retirement, inflation, which Ms. VanCaspel calls "the Robin Hood of the '80s" because "it takes from the ignorant and gives to the well-informed" who know how to make their investments rise along with inflation, sheltering income by understanding and applying tax laws to reduce the largest financial expense of all—taxes.

Ms. VanCaspel, "We are spending millions of dollars teaching both young people and adults to earn dollars, yet we are not teaching them what to do with these dollars once they are earned. And that's the tragic mistake we're making. In fact, only two out of every 100 persons who reach the age of 65 are financially independent."

**JAZZ TEST**  
The General Assembly is not empowered to undertake action on its own initiative, or at the request of any of its members, to maintain or restore international peace and security.

According to Chapter VII of the Charter, it is the Security Council which is authorized to take action on its own initiative, or at the request of any of its members, to maintain or restore international peace and security.

## Emergency services take slice of traffic fines

Motorists in Mississippi who have to pay fines for hazardous moving traffic violations are indirectly supporting local emergency medical service programs.

Since July 1, hazardous moving traffic violations have included an extra \$5 which is used for local EMS programs. The extra fine is a result of House Bill 985, which passed in the 1981 session of the Mississippi Legislature and became effective July 1.

House Bill 985 creates an Emergency Medical Services Fund in the State Treasury to provide a source of revenue for the support of EMS programs operated by cities, counties, and EMS districts.

The Legislature will appropriate annually to the State Department of Health for redistribution to cities and counties which support local EMS programs.

The Department of Health will be responsible for administration and accountability of the fund.

Wade Sprull Jr., director of the

Department of Health, Office of Motor Vehicle Safety, said that the current local support of EMS programs is the most available locally to serve the people who come from rural areas and do not have access to urban areas.

Other hazardous moving traffic violations are improper passing, trailing load, "puffin" drunk, failure to yield, following too close, run stop sign, improper turn, driving on wrong side of highway, and hit and run.

According to the 1980 Census and based on the number of such violations, the Mississippi Highway Safety Patrol reported in 1981, the new law is estimated to generate nearly \$2 million per year for EMS support.

The Highway Patrol reported in early 1982 that the minimum fine in Mississippi is one of the lowest in the southern United States. The increase brings the State's enforcement assessment into line with other states.

## County Agent's Notes

By John Smith

### STOPPING EROSION

The new focus on soil erosion and conservation is no accident. According to the Soil Conservation Service, Mississippi farmers are losing 64 tons of topsoil each year, and that figure is rising.

Across the nation, it's estimated that between 4 and 6 billion tons of topsoil are removed each year by erosion. That figures into an average loss of about 5 tons per acre each year.

Just how to go about stopping these kinds of losses is a question where common sense often gets overruled by things like emotions, and politics that sometimes put erosion doomsday just a few years away.

A lot of farm experts believe that at least part of the erosion solution is using minimum tillage or no-tillage practices. These production practices are already being used by many farmers in Hancock County.

Reduced tillage or no-tillage farming saves equipment, time, labor, fuel and money as well as soils. But these benefits don't come without some demands and risks on the part of farmers.

The big problem farmers have with conservation tillage is fitting the best program to the land, the crop and to the weed situation without cutting yields. Even so, conservation tillage is on the increase because it gives farmers an opportunity to cut costs at the same time they control erosion.

The Hancock County Extension office is always ready to help farmers choose conservation practices and develop crop production programs that will reduce soil erosion and keep crop yields up.

**FARM NUMBERS**  
The number of farms in the United States had dropped for the last 45 years until 1981 brought a change in the trend. The current trend of higher farm numbers is expected to continue this year.

The increase in farm numbers seems to be in two categories: small farms with less than \$10,000 in annual sales and

large farms with more than \$100,000 in sales.

One reason for the increase in the number of farms may be the definition of a farm. To qualify as a farm, a farm business has to generate \$1,000 worth of agricultural sales annually.

This probably includes many persons who are not traditionally considered farmers. And inflation could push some individuals into the \$1,000 category.

A movement of the population back to rural areas may be another reason behind the rise in the number of farms.

**LAND PRICES**  
Across the country, high interest rates, high production costs and low crop prices are depressing farmland values. It's no different in Mississippi and Hancock County.

Land values in the state have dropped more than 4 percent in the last year. As of April, the estimated value of one acre of land with buildings in the state was an even \$1,000, \$47 less than in 1981.

Before this drop, the value of land in Mississippi has risen 27 percent in 1980 to lead the nation. In fact, land was up more than 20 percent in the previous five years in the state.

On a nationwide basis, the price of farmland dropped less than 1 percent in the same period. An acre of U.S. land is now worth \$795. This is the first drop in the national average price of land since the early 1960's.

The demand for farmland is down, and the reason is the poor outlook for net farm income. As farmers know, farm income has been low for the past two years and is expected to be low again in 1982.

Despite the drop in land values, it's important to keep in mind that land prices are almost sure to move up over the long haul. A rebound in the farm economy could push prices up rather quickly.

Also on the positive side, the increase in farm production costs seems to be moderating. Costs should be up only about 5 percent this year, the lowest in

### PESTICIDES

Whether you have a one-row garden or a thousand acres, you need to store pesticides in a safe place to avoid tragic accidents.

One of the best ways to keep pesticides safe is in a locked cabinet or room in their original container.

Don't put pesticides in a soft drink bottle, milk jug or similar container. That's just inviting trouble. And never store them near food or medicine.

To lessen the danger of pesticide misuse, keep labels intact on all pesticide containers. Labels have important information about the product's use and what to do in case of an accident.

**SUMMER COMPOST**  
If you haven't started your summer compost, there's still time. A good composting system reduces leaves, grass clippings and household scraps to a fraction of their normal volume. This makes a good soil builder for the home garden.

Use only organic material in the compost. Mix water and a broad selection of decomposition material with the refuse and let time and nature take care of the rest.

# Money Talk

By Norine Barnes

When buying jewelry, consumers should be alert to the fact that many jewelers offer "special" prices on jewelry. For example, an ad on TV or in the magazine section of a Sunday newspaper may offer a diamond necklace for \$10, or a diamond pendant for \$12. With the highest of jewelry, such offers sound too good to be true. It is wise to inspect jewelry before buying it. If jewelry is to be ordered through the mail, be sure the seller's policy allows returns and cash refunds.

To avoid disappointment, the consumer should carefully read or listen to the ad, and have realistic expectations. Look for words that give sizes, measurements, or weights.

Discount words that are based on opinion and do not have a clear definition, for example "fantastic, beautiful, and lovely."

Become familiar with commonly used jewelry terms to better understand what to expect, for example:

—Carat, the basic unit of weight for gemstones including diamonds. A carat weighs one-fifth of a gram; 142 carats equal one ounce.

One carat has 100 points. Twenty-five points is 0.25 carat.

—Karat expresses the quantity of gold in the jewelry. Pure gold is 24K. Thus, 12K gold is one-half gold and one-half base metal or alloy. Ten karat gold is the lowest quality gold that can be sold as karat jewelry in the U.S.

—Solid gold means only that inside of the object is not hollow. Look for the karat rating to determine purity of the gold.

—Gold filled means there is a base metal which has a layer of karat gold applied over it. This layer must represent at least 5 percent of the total weight and be of at least 10K gold.

—Gold electroplated is a process by which a thin layer of gold is deposited on a base metal. The minimum required thickness of the gold coating is 7 millionths of an inch.

—Imitation means to resemble a more costly material, for example imitation emerald is probably green glass.

—Synthetic, a man-made duplicate of a naturally occurring substance. A synthetic gemstone has the same chemical composition, physical, and optical qualities as a natural gemstone.

Before ordering the bargain jewelry, remember:

—Discounted karat gold chains are usually very light weight and delicate. They may be suitable for normal use and wear, but usually are difficult to repair.

—Discounted diamonds are usually very small. Many ads claim a 1/2 carat round diamond weighing .25 points. That diamond weighs one-fourth of a point and is 1/400th of a carat. It is about the size of a pinhead. Round brilliant cut diamonds have 58 facets. Therefore, a 1/2 carat diamond has much the same cut as a 1/4 carat diamond.

—Gemstones such as diamonds and emeralds must be cut and polished to make fine jewelry. The quality of the cut and polish is usually indicated by the number of facets. The more facets, the better the quality and value. The price of a diamond is determined by its carat weight, color, clarity, and cut. A diamond with two facets is worth less than a diamond with 58 facets. A very clear diamond with a poor cut is worth less than a diamond with a good cut and some inclusions. The price of a diamond is also determined by its shape. Round brilliant cut diamonds are the most popular and therefore the most expensive. Other popular shapes include oval, pear, heart, and cushion. The price of a diamond is also determined by its brand name. Some diamonds are sold under brand names such as De Beers, Tiffany, and Cartier. These diamonds are usually of high quality and command a premium price.

**ROTARY DIRECTORS**—Judge Ruble Griffin, second from left, installs the directors of the Bay St. Louis Rotary Club at the Bay-Waveland Yacht Club. The directors include, from left, Bob Hubbard, Judge Griffin, Randle Hatton, and David Treutel, with Robert Kane, seated, past-president, and his wife Ellen. Kane is a member of the board of directors in addition to Pete Chapman. Judge Griffin is a past president of the Bay Rotary Club. (Staff photo by Ellis Cuevas).

## Military Mention

**LT TURNIPSEED**  
Army Reserve Second Lt. Edward C. Turnipseed, son of Patricia Turnipseed of 341 deMontluzin Street, Bay St. Louis, has completed an infantry officer basic course at the U.S. Army Infantry School, Fort Benning, Ga.

Students received instruction in leadership, intelligence, map and airphoto reading, operations, logistics, tactical communications and weapons. This training was designed to prepare students for the duties and responsibilities of a company-grade officer.

He is a 1981 graduate of the University of Southern Mississippi at Hattiesburg.

**AIRMAN GREAVES**  
Airman Dale A. Greaves, son of Carl E. and Phyllis A. Greaves of 98161 Golf Club Drive, Bay St. Louis, has been assigned to Sheppard Air Force Base, Texas, after completing Air Force basic training.

During the six weeks at Lackland Air Force Base, Texas, the airman studied the Air Force mission, organization and customs and received special training in human relations.

In addition, airmen who complete basic training earn credits toward an associate degree in applied science through the Community College of the Air Force.

The airman will now receive specialized instruction in the aircraft maintenance field.

The airman is a 1981 graduate of Hancock North Central High School, Bay St. Louis.

**PVT. BOWSER**  
Pvt. Carl J. Bowser, son of Admiral J. Bowser of 373 Davis Ave., and Joycelyn M. Bowser of 7 Debbie Circle, both of Pass Christian, has completed one station unit training (OSUT) at the U.S. Army Infantry School, Fort Benning, Ga.

OSUT is a 12-week period which combines basic combat training and advanced individual training.

The training included weapons qualifications, squad tactics, patrolling, landmine warfare, field communications and combat operations.

Completion of this course qualified the soldier as a light-weapons infantryman and as an indirect-fire crewman.

Soldiers were taught to perform any of the duties in a rifle or mortar squad.

His wife, Violet, is the daughter of Wendell Swainer of Route 3, Pass Christian.

He is a 1980 graduate of Pass Christian High School.

Your WILL is a way to vanquish EMPHYSEMA and ASTHMA.

One sentence inserted by your attorney—

... and the American Lung Association will be the beneficiary of the sum of ... dollars.

... and the American Lung Association will be the beneficiary of the sum of ... dollars.

... and the American Lung Association will be the beneficiary of the sum of ... dollars.

## Liquid petroleum gas water heater controls considered dangerous

Charging that the Robertshaw Controls Company in 1974 failed to report to the CPSC that there had been approximately 27 deaths and injuries associated with a defect in some of the firm's Unitrol 400 and Unitrol 200 gas water heater controls which could create a substantial product hazard, the U.S. Consumer Product Safety Commission staff has filed an administrative complaint against the company headquartered in Richmond, Virginia asking a civil penalty of \$500,000.

The complaint charges Robertshaw Controls Company, a world wide manufacturer of automatic energy controls and control systems for industry, the home and commercial buildings with violating the Consumer Product Safety Act by filing incomplete and misleading information with the commission about the gas water heater control defect.

The complaint further alleges that after April 1974, Robertshaw learned of other deaths and injuries related to the Unitrol, but failed to inform the commission of all such deaths and injuries, as required by the Consumer Product Safety Act.

The complaint asserts that the commission was not adequately informed concerning the defect until August 1980, when Robertshaw responded to a commission staff request to verify a report received

from a third party that more deaths and injuries had occurred. The complaint alleges that the defect in the controls caused gas to be vented to the living space.

According to the commission staff complaint, approximately 50,000 of the controls manufactured by Robertshaw from December 1954 through March 1981 were installed in liquid petroleum gas water heaters nationwide.

These controls still in use are being recalled by Robertshaw. The complaint alleges that when the pilot is extinguished for any reason in a liquid petroleum gas water heater containing the control, the automatic pilot function of the control can, under certain conditions, fail to operate as intended, by failing to stop the continuing flow of unburned gas to the main burner of the water heater, thereby creating a fire and explosion hazard.

The charges in the complaint will be heard before an administrative law judge. If members of the public have any further questions, they should contact the CPSC Hotline 800-633-3261.

## HBO DURING JULY

Following are picks and pans of movies on HBO during July:

(1) 'S.O.B.' is an adult comedy starring Julie Andrews and William Holden. Directed by Andrews' husband, Blake Edwards, 'S.O.B.' is an insider's view of Hollywood. And while the outlook isn't always flattering, the style of this film keeps things moving.

There's also that infamous scene wherein Andrews dispels all myths that she is still the sweet and innocent Mary Poppins.

A wild, erratic cast including Loretta Swit, Shelly Winters, Robert Vaughn, Robert Preston and Richard Mulligan co-star in this contemporary comedy.

(2) 'Raggedy Man,' although shunned by the movie crowd, was a big hit with the critics. It stars Sissy Spacek in her first film role since she won her Oscar for 'Coal Miner's Daughter.'

It concerns Spacek's life in a small Texas town as she tries to cope with her own shortcomings and her two small sons. A good film about life and love.

(3) 'Wolfen' stars the resurgent Albert Finney in a horror tale about wolflike beings haunting New York City. It is a graphically violent film which contains some interesting camera movements and a fine performance by Finney, who is now appearing in two current films, 'Annie' and 'Shoot the Moon.'

(4) 'Gas' is a stupid comedy that runs on empty throughout most of the picture. A fine cast including Donald Sutherland, Susan Anspach and Sterling Hayden are thoroughly wasted

in this methane mess.

(5) 'Only When I Laugh' is another offering by Neil Simon starring his actress-wife, Marsha Mason. Mason stars as an alcoholic who is trying to reconcile differences with her teenage daughter played by Kristy McNichol. It includes all of Simon's patented rapid-fire barbs and New York wit but ultimately comes up empty in the entertainment department.

(6) 'Kramer vs. Kramer' makes another appearance on HBO this month due to its past popularity. And rightly so. This superb picture garnered Oscars for leading actor Dustin Hoffman, supporting actress Meryl Streep and writer-director Robert Benton, as well as taking Best Picture of the year honors. It is a superb piece of popular moviemaking that should put a tear in your eye.

(7) 'For Your Eyes Only' is another in the now-famous Bond series. Roger Moore is Agent 007, fighting, loving and thinking his way through a myriad of outrageous predicaments. This time he tries to save a nuclear-sub activating device from getting to the Soviets. If you're a Bond fan you should love this one.

(8) 'History of the World Part I' is an insane look at historical comedy by Mel Brooks. It stars Brooks' regulars Harvey Corman, Sid Caesar and Madeline Kahn in a befuddled attempt to poke fun at the Stone Age, the Spanish Inquisition and the French Revolution. Better wait for Part II on this one.

(9) 'Star Trek—The Motion Picture' is a yawning exercise in space and unless you're a true Trekkie fan, you'd be better off

letting this Enterprise sail off in oblivion. William Shatner and Leonard Nimoy head the cast of TV regulars.

(10) 'Tess' is a beautiful, romantic film from Roman Polanski. It stars Nastassia Kinski and Peter Firth in a film about love during the Victorian age in England. A epic film running nearly three hours, 'Tess' never loses its vitality and sense of direction. A truly great film.

(11) 'Gloria' stars Gena Rowlands in a tour-de-force performance about a lady not backing down from the mob. This performance, directed by her husband, John Cassavetes, very nearly won Rowlands an Academy Award.

(12) 'The Great Muppet Caper' is great fun for the whole family. A musical-comedy starring all the Muppets, Charles Grodin and Diana Rigg, with cameo appearances by several leading stars. A delight to watch.

(13) 'Fame' is the brilliant second installment in a trilogy of great films by British director Alan Parker. His first 'Midnight Express' and the current 'Shoot the Moon,' together with 'Fame' demonstrate this director's effectiveness.

'Fame' is an energetic, fast-paced film with dazzling song and dance numbers. A very good, high-powered film.

(14) 'Raging Bull' returns to HBO. It is the hard-hitting account of the life of middleweight champion Jake LaMotta. Starring Robert DeNiro, who won an Oscar for his great performance, and directed by Martin Scorsese, 'Raging Bull' is an incredible film.

**BAY AREA VISITORS**—Beauty Queens Lynanne, left, and Leanne Derryberry, Miss Arkansas 1981 and 1982, respectively, are to be visiting in the Bay St. Louis area Friday, July 16 through Wednesday, July 14 completing photo assignments with Michael McCormick who maintains a photography studio in the Bay Royale Apartments here. McCormick was official photographer for the 1982 Miss USA Pageant in Gulfport. Leanne was originally selected first runnerup in the 1982 Miss Arkansas Pageant, but moved up to the first place position when the original Miss Arkansas, Terry Utley, was selected Miss USA earlier this year in Biloxi. The Derryberry twins are residents of Jerusalem, Ark.

## SUNDAY

### FAITH MINISTRY

Faith Assembly of God Church, Hwy. 43 and 603, Kiln will host an appearance by Pam Paxton of Mudasa International Evangelistic Association, Inc. of Nashville, Tenn. at 7 p.m. Sunday, July 11. Mrs. Paxton is the wife of singer and song writer Gary Paxton. She is a survivor of the WW II Holocaust.

### SODALITY MASS

St. Clare's Sodality Mass will be celebrated Sunday, July 4, at 9 a.m., preceded by the Rosary at 8:30 a.m.

### BAY ST. LOUIS AA

The Mustard Seed Group of Alcoholics Anonymous conducts an open discussion meeting each Sunday, 7:30 p.m. at Virginia Hall, Christ Episcopal Church, Beach Boulevard, Bay St. Louis. Friends and relatives welcome. For information and assistance, call 467-6414.

### KC GAMES

Pere Le Duc Council No. 1522, Knights of Columbus sponsors games night each Sunday, 7 p.m. at the Council home, 315 Main St., Bay St. Louis.

## MONDAY

### SWIMMING LESSONS

Certified water safety instructors Brother Albert Ledet, SC, Jeanette Handshoe and Dot Kersanac are conducting free swimming classes from 1 to 2 p.m. Mondays through Fridays at St. Stanislaus High School pool in Bay St. Louis. Children of first grade age and above are eligible. All sessions begin on Mondays. Schedule includes: Intermediate Swimmer Class, July 12-16; and Swimmer Class, July 19-23 and 26-30; Advanced Life Saving for 15-year-olds and above, August 2-13 from 1:30 to 3 p.m.; Adult Swimming Classes, August 2-13, excluding weekends, 7 p.m. Prerequisite for all classes is successful completion of the preceding class. Advanced swimmer class will be conducted for advanced life savers seeking water safety instructor certification. The program is sponsored by the American Red Cross.

### BAY-WAVELAND AA

The Bay-Waveland Group of Alcoholics Anonymous conducts a closed discussion meeting each Monday at 8 p.m. at St. Augustine Seminary, Uman Avenue, Bay St. Louis. For information or assistance, call 467-6414.

### HISTORICAL SOCIETY

The Hancock County Historical Society meets the third Monday of each month at 7 p.m. in Gulf National Bank's Civic Room, US-90, Bay St. Louis.

## TUESDAY

### BWYC AUXILIARY

Bay-Waveland Yacht Club Auxiliary will meet Tuesday July 13 at 5 p.m. at the club. A beach party will follow. For reservations call Bertille Lasseigne, 452-4273 or Bobby Leapey, 452-2238.

### SWEET ADELINES

A prospective chapter of Sweet Adelines, four-part harmony group, will meet at City-County Library, US-90, Bay St. Louis, Uman Avenue entrance, 7:30 p.m. every Tuesday night. For information call Carol Roberts at 467-1017 or Marge Darling at 255-1583.

### LEGION AUXILIARY

American Legion Auxiliary Unit No. 77 meets on the first Tuesday of each month at the American Legion Home on Coleman Avenue at 7:30 p.m.

### SCOUT MEETING

Boy Scout Troop No. 217 meets at 7 p.m. each Tuesday in the 'Scout Hut' of Our Lady of the Gulf Parish Annex Building, Bay St. Louis. Membership in the troop, sponsored by the parish, is open to youth 11-years-old and older.

### MENTAL HEALTH

Families In Touch, a support organization for friends and relatives of mentally ill persons, sponsored by the Harrison County Association for Mental Health, meets on the third Tuesday of each month in the Harrison County Courthouse in Gulfport. For information call 864-6274.

### KILN AA

The Kiln Group, Alcoholics Anonymous, meets at 8 p.m. Tuesdays at the Kiln Community Center, Hwy. 43 just west of Hwy. 603. For information or assistance, call 467-6414.

### BAY-WAVELAND AA

The Bay-Waveland Group of Alcoholics Anonymous conducts a closed study meeting each Tuesday at 8 p.m., St. Augustine Seminary, Uman Avenue, Bay St. Louis. For information or assistance, call 467-6414.

### DRIVERS LICENSE

The Mississippi Highway Safety Patrol Drivers' License office in the Crawford Room of City-County Library Uman Street entrance issues licenses each Tuesday 8:45 a.m. to 4 p.m. Phone 467-0346.

## WEDNESDAY

## Minacapelli's to open 'The Odd Couple' July 23

Minacapelli's Dinner Theatre in Slidell, La. reports an encore presentation of Neil Simon's comedy classic, "The Odd Couple," will open July 23 for a run through Sep. 5.

Hailed as Simon's funniest play, "The Odd Couple" tells the story of two mismatched bachelors, Oscar and Felix, and their outrageously funny misadventures after Felix, the neatness bug, moves in with Oscar, the inveterate slob.

Oscar is reasonably satisfied with his sloppy existence in a one-bedroom New York apartment, which is getting sloppier by the day.

He hosts a Friday night poker club of which Felix is a member. When Felix fails to show up one Friday, the members discover that Felix

has been thrown out of his house by his wife, and Oscar takes him in. Then the fun begins.

Felix takes over the cleaning and the cooking in the apartment, and starts economy measures which drive Oscar crazy. Then he fouls up a double date with two English girls living in the building, driving Oscar off the deep end and setting up the incredible funny climax, which must be seen to be believed.

Adding to the comedy is the fact that Felix is a well known local theatergoer. Gabb has previously appeared at Minacapelli's in "Three Goats and a Blanket" and as the hilarious bank examiner in "No Sex Please, We're British."

Oscar Madison is portrayed by Bob Kearney. No stranger to Minacapelli's, Kearney has performed in "Barefoot in the Park," "Winter Chicken," and "Don't Drink the Water."

Playing Murray the Cop is Charles Ferrara, who has delighted Minacapelli audiences as the Sultan in "Don't Drink the Water," and as Big Jule in the recent "Guys and Dolls."

Cree Rankin, a newcomer to Minacapelli's, but a New Orleans favorite, plays Speed, the cynical poker player.

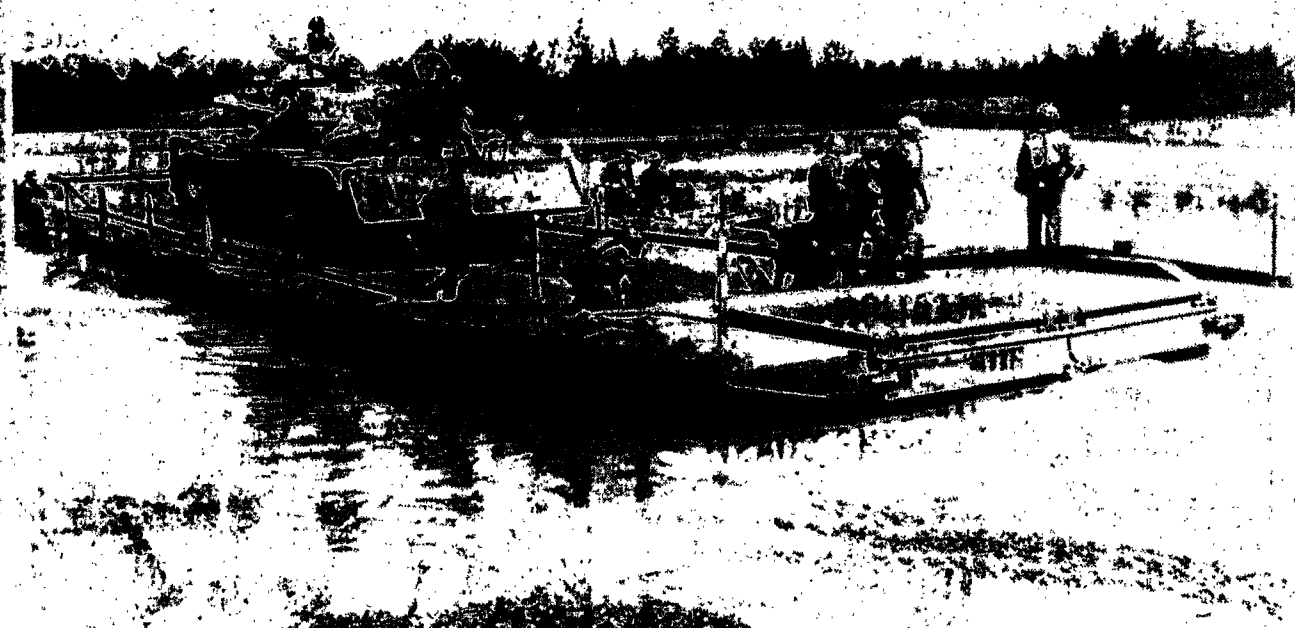

Andre Laborde, the popular radio entertainer at WSMB, plays Roy the accountant. Minacapelli's audiences will remember his fine performance as Sky Masterson in "Guys and Dolls."

Glen Gomez, the show-stopping Nicely-Nicely Johnson from "Guys and Dolls" plays the put-upon Vinnie.

The Pigeon sisters, "spelled like Coo-Coo, not Walter" are portrayed by the two Ginas, Poretto and Paureto, the latter having enchanted audiences as the title character in "Natalie Needs a Nightie," Minacapelli's current offering.

"The Odd Couple" will be performed Thursday through Saturday at 8:30 p.m. with a buffet preceding performance at 6:30 p.m.

Sunday matinee is at 2:30 p.m. preceded by a buffet at 1 p.m. For reservations call 1-504-643-9671 in Slidell.

**AMPHIBIOUS CROSSING**—Members of the 12th Engineer Company, Mississippi Army National Guard, are shown in the foreground crossing a temporary bridge over a body of water. In the background, a large construction site is visible, showing the progress of a major project.

Tupelo, the 12th Engineer Company is now undergoing two weeks of annual training at the Stone County installation along with Detachments 1 and 2, headquartered in Meridian and Purvis, respectively. The 12th Public Affairs Detachment, MSARNG, is also present.

## Home cooling literature available from agency

With months of summer heat and humidity, the Energy Department of Energy and Conservation has available literature on home cooling. The literature is available in English and Spanish. It includes information on energy conservation, home cooling, and energy conservation. The literature is available from the Energy Department of Energy and Conservation.
